REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: none of the prior art either alone or in combination disclose or teach of the claimed combination of limitations to warrant a rejection under 35 USC 102 or 103.

Specifically, with respect to independent claim 1, none of the prior art alone or in combination disclose or teach of a zoom lens comprising positive, positive and negative lens units in order from an object side as claimed, specifically wherein the first and third lens units are constructed with two lenses each and the second lens unit has first and second positive lenses, each with a concave surface facing the object side, so that the first, second and third lens units include six lenses in total.

Specifically, with respect to independent claim 2, none of the prior art alone or in combination disclose or teach of a zoom lens comprising positive, positive and negative lens units in order from an object side as claimed, specifically wherein the first lens unit is constructed with two lenses, the third lens unit has a plastic lens with aspherical surfaces and a negative lens in order from the object side and the second lens unit has first and second positive lenses, each with a concave surface facing the object side, so that the first, second and third lens units include six lenses in total.

Specifically, with respect to independent claim 9, none of the prior art alone or in combination disclose or teach of a camera having a zoom lens comprising positive, positive and negative lens units in order from an object side as claimed, specifically

Art Unit: 2873

wherein the first and third lens units are constructed with two lenses each and the second lens unit has first and second positive lenses, each with a concave surface facing the object side, so that the first, second and third lens units include six lenses in total and satisfies the condition regarding maximum image height.

Specifically, with respect to independent claim 12, none of the prior art alone or in combination disclose or teach of a camera having a zoom lens comprising positive, positive and negative lens units in order from an object side as claimed, specifically wherein the first and third lens units are constructed with two lenses each and the second lens unit has first and second positive lenses, each with a concave surface facing the object side, so that the first, second and third lens units include six lenses in total.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CONCLUSION

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Aoki (U.S. 5,361,167) and Shimo (JP 10020193 A) are being cited herein to show zoom lenses comprising some of the structural limitations of that of the claimed invention, but do not specifically disclose the two positive lens elements in the second group as claimed.
